

Role: Senior Civil Engineer

Location: Glasgow & Manchester

Salary: Negotiable

Woolgar **Hunter** are a design led Civil & Structural Engineering consultancy delivering projects across the UK. The Head Office of 55+ staff is based in Glasgow, with a busy growing design studio in Manchester.

As part of our continued success, we are seeing a significant growth in our Civil Engineering/ Development Infrastructure workload and are looking to expand this team, which currently comprises 12 technical staff across all levels. The project growth is evolving both in Scotland and the north of England, across various sectors, including industrial & logistics, commercial offices, residential and educational campuses.

We are therefore looking to appoint a passionate, talented, and enthusiastic Senior Civil Engineer, to join our Teams in Glasgow and Manchester, to work on a range of live projects. The successful candidates will ideally have 8+ years of engineering design experience and be a chartered Engineer. Candidates who are still working toward chartership will also be considered based on their experience. Woolgar **Hunter** operate an accredited ICE training scheme and support our staff to chartership.

Candidates will be technically proficient, with a solid educational background, and keen to play a key role as part of an enthusiastic and active team who are driven by quality design, with a focus on sustainable engineering, and a commitment to successful project delivery. Candidates should be proficient in roads, drainage, and earthworks design, ideally utilising CIVILS 3D and Microdrainage software.

In return, we provide opportunity to work on a broad range of project types and scales, the majority of which are relatively local and likely to progress to construction stage, therefore allowing excellent experience. We work within a friendly studio environment that is both creative, passionate, practical, and design focused in its approach. The role will report to Project Directors and will work closely with a professional and experienced team of senior engineers, engineers and technicians.

This is an excellent opportunity with a successful engineering consultancy, and you will be rewarded with a competitive salary and benefits package, with career-propelling responsibilities and projects.
